PROFESSIONAL SUMMARY

Computer Science undergraduate at VIT with experience in AI, Full Stack Development, and Python-based applications. Skilled in building web applications, AI-powered tools, and solving programming problems using modern development practices. Seeking software engineering and AI-focused opportunities.

SKILLS & CORE COMPETENCIES

Languages: C/C++, Java, Python, JavaScript, SQL

Web Development: Node.js, Express.js, ReactJS, EJS, HTML5, CSS3

Databases & Cloud: MongoDB, Relational Databases (SQL), Azure Cognitive Services, AWS Fundamentals.

Tools & Libraries: Git, GitHub, NumPy, BeautifulSoup, RESTful APIs, Trie Data Structures

Technical Concepts: Software Development Life Cycle (SDLC), Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Natural Language Understanding (NLU), Machine Learning, Image Processing, Problem-Solving

WORK EXPERIENCE

GirlScript Summer of Code May 2026 - Present

Contributor

- Open-source projects using Git & GitHub, Debugging and feature enhancement

Vellore Institute of Technology Feb 2026 - Present

Technical Leader — VIT FeedBox Club

- Assisted members in technical problem-solving and collaboration

Nexus Spring of Code May 2026 - Present

Contributor

- Collaborative coding & open-source development, with issue tracking systems

EDUCATION

Vellore Institute of Technology Sep 2024 - Present

B.Tech in Computer Science and Engineering

Relevant Coursework: Distributed Systems, Operating Systems, Machine Learning, Web Development, DSA, Image Processing, OOP

Key Certifications: Introduction to Gen. AI -Google, Cloud Computing -NPTEL

Kendriya Vidyalaya AGCR April 2023 - May 2024

Class 12 (Senior Secondary) **Percentage: 75%**

PROJECT WORK

- Word Lookup Dictionary**

Built a Python dictionary app using Trie and edit-distance algorithms for fast search and spelling correction.

Tech Stack: Python, BeautifulSoup, Trie, Edit Distance

[View Project](#)

- Jarvis (Voice-Enabled Chatbot)**

Developed a Python voice assistant using NLU for task automation and intent recognition.

Tech Stack: Python, NLP, NLU

[View Source Code](#)

- AI Product Review Analyzer**

Built an AI-powered sentiment analyzer using HTML, CSS, JavaScript and API integration.

Tech Stack: HTML, CSS, JavaScript, API Integration

[View GitHub Repo](#)

AWARDS AND CERTIFICATES

- Software Engineer Intern — HackerRank
- Introduction to Generative AI — Google
- Cloud Computing — NPTEL
- SQL and Relational Databases 101 — Coursera
